

Galactic Alignment - 2012

Our entire Solar System (our Sun and planets) revolve around a central Sun Alcyone (in the Constellation of Pleiades), which in turn revolves around the GC, the centre of the Milky Way. Thus the GC is our heart, our connection to the greater Cosmos from which we have all been birthed.

The GC is 26,000 Light Years from our Sun and is actually a 'Black Hole'. A hole that vacuums up everything – light & matter and compresses it. It is referred to as zero point, and it is where we are birthed and where we pass through when we die.

When we are birthed through the GCs 'birth canal', our light codes (our higher vibrational resonances carrying the blueprints of our past, present and potential future) are switched off – hence we forget the Divine Soul's that we truly are and always have been.

However, the GC being our birth Mother, does not leave her children completely alone following their decent. The GC is continually emitting waves of energy referred to as 'Love Waves'. These waves assist in connecting all of creation, nurturing and facilitating our growth.

The Love Waves are an integral part of the Great Shift, and preparing us for our leap in consciousness. Through the Love Waves we are not separate, but we are all connected and we are all ONE, Living One Vibrational Energy.

The GC sits at 26 degrees 56minutes Sagittarius. It takes 225 million years for the Milky Way galaxy to make one complete revolution around its core the GC and conversely it takes us 26,000 years for one complete revolution around Alcyone.

In 2012 our GC and our Central Sun Alcyone will be completely aligned (at 26-56) with our Solar System sun meaning the end of a 225 million and 26,000 year cycle in 2012 (we will talk about this alignment in future Updates). This is the aligning of the three spiritual hearts (suns), all coming together as ONE.

In the celestial skies when the 3 suns align, humanity will move through a spiritual birthing into a new way of living. A doorway opens for humanity to transcend our limited beliefs, our outdated paradigm of survival.... but for this to occur, we must take action now.

Many indigenous cultures, saints, sages and shamans from around the world have spoken about this time in history - a time where we are faced with the decision to responsibly address our future and that of future generations. The time is now, and we must act before the opportunity is lost.

This is a time in history where we can collectively transcend the material consciousness of our culture, re-write our value system and unify together in peace, spiritual awareness, respect of our resources and other people, nature and the entire cosmos. United together we can make profound leaps in consciousness, and live peacefully together in harmony with all the elements of creation.

During Stage III of The Wave of Love (monthly emails commencing January 2008) - we will address just how humanity can align with the Wave of Love energies from our Galactic Centre - in order to create a Heaven here on Earth by 2012.
